WE ARE THE ONLY MANUFACTURER
IN THE WORLD TO MAKE THE IMAGE
OF OUR LADY OF GUADALUPE
IN FAUX HENEQUEN CACTUS TEXTILE.

We understand our cause: Bring the original image of Our Lady of Guadalupe to ALL the homes of the United States.
This is a legitimate effort. We are committed; to the best quality and a reasonable price.
We believe; that artwork inspired in Our Lady of Guadalupe is a unique expression of pride and faith.

Dear Friends:

This is Ricardo Flores, Since 2010 President and founder of Our Lady of Guadalupe Art LLC.

I am sending you a courtesy sample, I hope our work will speak for itself.

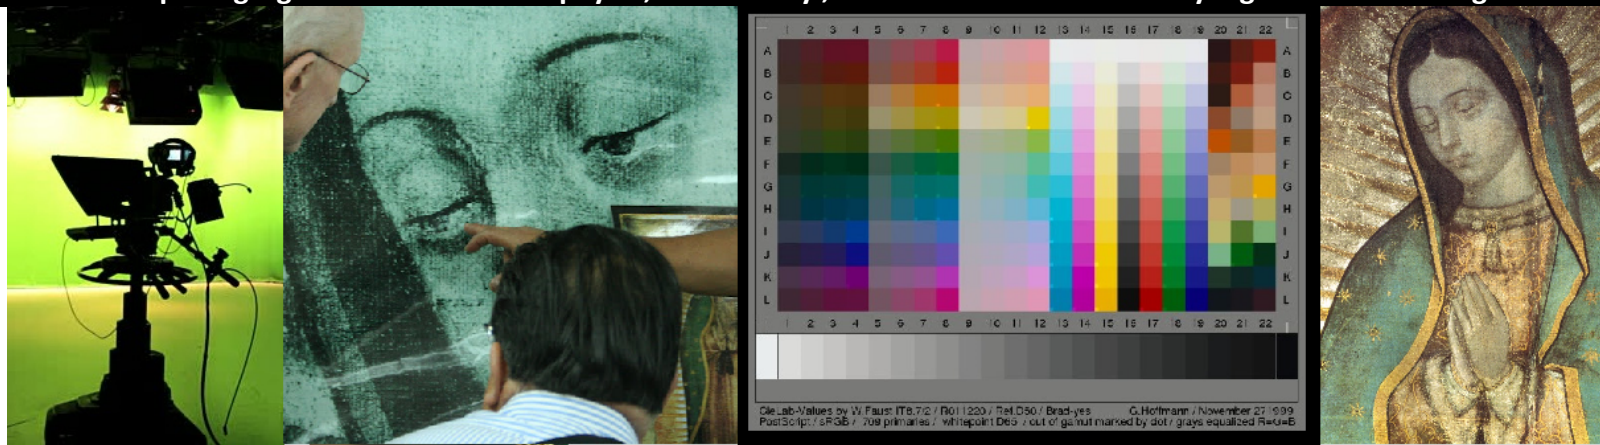

We proudly offer this image of Our Mother of Guadalupe, we make it in Mexico and we import it to the USA. We pack and send it from Texas.

We made it our life mission to bring the closest possible image of OLOG to all the United States. So, Our Lady of Guadalupe after 486 years could come to every home, every workplace.

We have found most people, even though they love her, don't know which IS the real image she left, and also, they don't know she left her image in the humblest cloth.

Our work is UNIQUE, and following are the 3 technologies and capabilities involved, when combined, make our work possible;

1) Very High-resolution FILE of the original image. Eventhough they are many free versions we bring only the original image that hundreds of millions have visited in pilimigrage to her Shrine in Tepeyac , Mexico City , .For this we obtained a very high resolution image.

2 We Developed a Special Textile. 100% Polyester Faux Henequen Cactus Fiber in a specific base color, the image was left on very humble cactus fiber as a powerfull message of humility.

3) We have our own printing operation: The sublimation printing process allows to create full color products byavoiding the old silkscreen or decal process.

Sublimation printing has been along for a long time ,but this new generation produces premium full-color,photographic quality images that will not crack,peel or wash away from the substrate.Our print has hundreds of thousands of color shades.

Even though the production technique is relatively simple, It's the chemical process that differentiates sublimation from any other form of textile printing; when sublimation inks are heated over 380 F they turn into gas and form a permanent bond.

If its ok, I may emphasize several issues about our work:

1) The factory is 100% “Sweatshop free” where most Catholic articles made in Asia really aren't.

2) They are proudly made in Mexico and also made by Guadalupanos.

3) The image is a precise digital photo of the original image, that is why you can see the small details of the pass of time.

4) We are the producers, (no middle men involved) and our real business is making printed textile shoe components for sports shoes by tens of thousands a day, this apostolate is something personal to spread the original image.

Our Tilma is sewn on the top with a pocket for hanging. We do not offer framing and don't encourage it, we have learned it's a personal decision ant that the message of the humble textile is in some way lost.

Thank You for reviewing our proposal.

We suggest our work to be offered as an ongoing fundraiser.

Sincerely.

Ricardo Flores
